Game Idea

Pumpkin Pie

The player lives on a small autumn farm with their grandma, helping her gather ingredients to bake a pumpkin pie. At first, it seems like a cozy errand, but the journey gradually reveals emotional undertones. Each ingredient is hidden within a different part of the farm, accessible only after solving light puzzles and unlocking new areas in a *Metroidvania-inspired* "lock & key" system. Collecting ingredients is paired with uncovering nostalgic sketches the player once drew with their grandpa, reinforcing themes of memory and family. The true purpose of the pie—that it's being baked in honor of the late grandpa—only becomes clear at the heartfelt ending.

Perspective & Art Style:

- 3D top-down farm world (fields, barns, shed, and cozy farmhouse)
- Characters, items, and memories rendered as 2D hand-drawn sprites, blending warmth and charm with the world's simplicity.

Genre:

- Story-driven Adventure
- Cozy Metroidvania-lite

Jam Theme Incorporation:

- TBD

Game Theme(s):

- Fall & harvest

- Family bonds & remembrance
- Nostalgia & emotion

Loop:

- Explore the farm starting in the barn.
- Collect an ingredient (e.g., eggs, milk) and locate the “key” item or puzzle solution.
- Use that key to unlock the next area (fields → shed → final area).
- Gather all 5 ingredients while collecting optional memory sketches.
- Return to grandma with ingredients.
- Endgame: bake the pie and reveal its true purpose.
